

INNOVATION ELEGANCE FLEXIBILITY

THE CABINET THAT CHANGES CABINETS

MASTER

CABINET MASTER

The idea was born in 2009: to reinvent the concept of the cabinet. To reinvent something you have to reinvent yourself. Fami has rethought its own Research & Development department with six new minds, mechanical and electronic engineers specialized in automation and project industrialization.

Drawer cabinet is designed to satisfy and adapt to customer needs. A product featuring unrivalled accuracy in production processes. A perfect combination of technology and functionality aimed at optimising workflows.

VERTEBRATE BAR

THE SYSTEM'S HEART AND BRAINS

The bar is an aluminium profile section that is always fixed and never rotates. The closing movement is obtained via blocks that move vertically – driven by one of the basic forces of physics: gravity.

The lighter the workload, the longer the component life.

The bar has 25 mm pitch holes – allowing for a number of closure heads to be fitted. This allows access to drawers to be split into multiple groups. The division into groups is configurable in height.

PATENTED

MECHANICAL SYSTEM LOCK CYLINDER

Transmission system from the lock cylinder to the head of the vertebrate bar with steel wire, with elastic sheath and linear movement.

The cylinder lock is divided into 23 different series: each series has keys numbered from 1 to 160, for a total of 3,680 different combinations.

PUSH TO OPEN – INDIVIDUAL DRAWER OPENING

Compared to traditional systems that require additional components on the front, the opening of drawers is a feature integrated in the cylinder. To open the drawers, it is enough to turn the key and press the lock cylinder. The fewer components in a given mechanism, the less likely the risk of breakdowns.

PATENTED

✓ syCONTROL

Mechanical or electronic lock providing high anti-tamper protection.

EVENT CONTROL SOFTWARE

Free reporting software downloadable from:
www.sylogik.com/sycontrol.

Latest 1000 events displayed with date, time, user and event type.
To be able to always control every opening and every access.

ELECTRONIC SYSTEM

The numerical code lock controls the opening and closing of the vertebrate bar and of the door. It can manage up to 10 users with 3 to 8 digits numerical codes. The event history can be downloaded by connecting the keypad to the PC with a cable. Up to 10 remote controls are available on request.

FREEDOM TO CONFIGURE

FLEXIBLE EXTRACTION

New, simple extension guide with mechanical adjustment of the drawer rear stop in 3 different positions. It allows 3 different capacities to be obtained: 50, 75, 100 kg. A new telescopic guide can be mounted on the drawer.

✓ syFLEX

Patented opening system allowing the user to customise extension and load capacity.

TELESCOPIC EXTRACTION

New extraction guide (extraction 100%) that guarantees load capacity of 200 kg in 10 dimensions.

Drawers/retractable shelves of Master series can mount independently both flexible and telescopic extraction rails.

WEB TO PRINT

SYLOGIK
smart solutions

The drawer front becomes a real visual interface.

- Customisable with design and decorative elements
- User Inputs: Labels for content description and classification
- User Outputs: Possibility of adding visual or descriptive messages on the handle

✓ syFRONT

Free Web to Print service for customising the labels to be affixed to the handle of the cabinet.

LABEL PRINTING SOFTWARE

- online and free
- it handles text, images, 8 types of barcode
- can be connected to (Excel) spreadsheets to print serial or progressive labels

THE FIRST FRONT BEARING CABINET IN THE WORLD

THE SIMPLER A MECHANISM DESIGN,
THE MORE EFFECTIVE ITS OPERATION

The plain guide has been extended as much as the closet.
The front bearing has been moved beyond the front of the drawer.
The result: a marked improvement in the drawer percentage
extension and drawer volume use. The shadow cone is nil in the
top drawers although these are adjusted to a 100 kg capacity.
